## JOB APPLIED FOR POSITION PREFERRED JOB STUDIES APPLIED FOR

### Assistant Photographer since 2010

I am a highly organised, enthusiastic and motivated photographer with a passion for fashion and portrait, i have a good eye for composition and detail. Since completing my Diploma of International master of fashion photography in EFTI last year, I have been working as a freelance photographer on a number of projects and published in paper magazines.

Working as a freelancer has enabled me to develop not only my photography skills using different styles and techniques, and for different commercial or artistic purposes; it has also developed my ability to quickly absorb a brief, adapt to varying work conditions and personality types, work quickly and efficiently, and deliver high quality photographs within tight timeframes.

I have solid technical skills using digital SLRs, and am confident using a range of lighting techniques to produce different effects. I have advanced skills in Photoshop as well as Capture One, and have experience uploading photographs into company databases and archives ( as dropbox,drive or wetransfer)

I am known for my attention to detail, and am an enthusiastic and efficient learner. Work well with different personality types, and deal with unexpected turns of events calmly and resourcefully. I have an organised and structured approach to work and always pre-plan every aspect of a shoot.
