### Profile

I have been a professional photographer for 8 years firstly shooting weddings but now sports focussing on cycling and triathlon. I authored the best selling book "Wedding Photography - A Guide to Posing".

### About Me

I am 42 and live in Kent so can easily travel into London. I want to learn new skills and build upon my studio experience. I did own a portrait studio a few years ago and experimented a lot. I would now like to assist more accomplished photographers with their lighting.

I also compete in triathlon so am fit and able to work for long periods and haul kit with no difficulty.

I may need some guidance initially as I am sure I have forgotten some aspects but used to work with Elinchrom lights. I have used Macs and photoshop extensively.
